By Eslam Khder

Example to print Date with jsp

By Eslam Khder

JSP Scripting Elements

Element	Syntax
JSP Expression	<%= some Java expression %>
JSP Scriptlet	<% some Java code: 1 to many lines %>
JSP Declaration	<% variable or method declaration %>

By Eslam Khder

<%= new String("Eraa Soft") %>

<%= 5*10 %>

<%= 5*10 %>

Insert 1 to many lines of Java code To include content in the page use: out.println(…)

```
<%
        many code
 %>
```

```
<%
for (int i=1; i <= 10; i++) {
out.println("nice");
}
%>
```

By Eslam Khder

variable or method declaration

```
<%!
        int id = 5;
 %>
```

```
<%!
void start(){
    return “start”;
 }
%>
```

<% start() =%>

EraaSoft

JSP and java class

By Eslam Khder

1. Create Java class

2. Call Java class from JSP
